Theoretical and Mathematical Physics

Applying the method of potentials to problem of interaction between spherical gravitational wave and constant electromagnetic field. V.I. Grigoryev and I.P. Denisova	3	1
Gottfried's integral and valence quarks contribution. E.N. Bukina, V.M. Dubovik, and V.S. Zamiralov	5	4
Some new properties of strongly nonlinear ion sound. I.M. Aleshin and D.V. Peregudov ..	8	9
Asymptotic behavior of effective action in supersymmetric theories. K.V. Stepan'yants and V.B. Fokin	11	14
On a manifold of the Laughlin problem unique solutions. B.A. Lysov and O.F. Dorofeev .	15	21

Radiophysics

Ion energy distribution function for gas discharge positive column in pure gases. S.A. Dvinin, V.A. Dovzhenko, and A.A. Kuzovnikov	19	27
A possibility of selective excitation of characteristic waves at doubly reflected ionospheric radio transmission path. V.V. Balinov, Yu.V. Berezin, and O.Yu. Volkov	22	32

Acoustics and Molecular Physics

Numerical simulation of nonlinear waves with "discontinuity" and "derivative discontinuity" singularities. A.A. Slavnov and V.A. Khokhlova	28	36
--	----	----

Solid-State Physics

Hall effect in frustrated ferrimagnetic alloys ϵ' -Mn ₃ Ga. V.N. Prudnikov and M.V. Prudnikova	36	42
Tunneling transparency of intentionally disordered superlattices in electric field. A.V. Dmitriev and O.V. Pupysheva	39	48
Mechanisms of surface energy dissipation in moving domain wall in iron single crystals. V.E. Zubov, A.D. Kudakov, N.L. Levshin, and P.A. Polyakov	43	53

Geophysics

Eddy instability and origination of whirlwinds and tornadoes. S.A. Arsen'ev, V.N. Nikolaevskii, and N.K. Shelkovnikov	50	57
---	----	----

Astronomy

Compatible analysis of variations in ion fluxes and spectra in geomagnetic trap during storms. A.S. Kovtyukh	53	62
--	----	----

(continued)

Brief Communications

Theoretical and Mathematical Physics

Explicit solutions of completely integrable classical three-particle system in an external field. D.V. Meshcheryakov and V.B. Tverskoi	56	66
Spectral problem for the Schrödinger radial equation. O.S. Pavlova and A.R. Frenkin	58	69
A waveguide in wave nonexcitation mode. A.N. Bogolyubov, A.L. Delitsyn, and A.G. Sveshnikov	60	73
One-loop energy corrections in the gauge field theory in 2 + 1 dimensions. V.Ch. Zhukovsky and N.A. Peskov	62	75

CONTENTS

VOLUME 55

NUMBER 2

MOSCOW UNIVERSITY PHYSICS BULLETIN

Pages
Russian/English

Theoretical and Mathematical Physics

The origin of magnetic fields of astrophysical objects. Yu.S. Vladimirov	6	1
Estimating string tension from finite-energy sum rules. D.V. Meshcheryakov and V.B. Tverskoi	9	5
Interpretation of some features of the plasmon spectrum of simple metals. I.M. Aleshin and D.V. Peregodov	11	8
To substantiation of the method of maximum entropy for solution of ill-posed problems. A.S. Leonov and A.G. Yagola	14	13
Differential-geometric criterion for kinematic integrability of equations with operators from $su(1,1)$ and $su(2)$. A.Yu. Kolesnik	16	16
Neutral particle radiation in electromagnetic field. A.E. Lobanov and O.S. Pavlova	18	19

Radiophysics

Suppression of opposite-wave generation in cyclotron-resonance masers with longitudinal profiling. A.F. Aleksandrov, V.A. Kubarev, and A.V. Mikhailov	20	23
---	----	----

Optics and Spectroscopy

Analysis of scattering properties of oxide particles on a multilayer substrate. N.V. Grishina, Yu.A. Eremin, and A.G. Sveshnikov	24	29
Studying the efficiency of scintillation detectors for back-scattered electrons in SEM. R.N. Birchenko, E.I. Rau, and M.N. Filippov	28	35
Effect of low-scale atmospheric turbulence alternation on the characteristics of narrow collimated laser beams. T.I. Arsenyan, A.M. Zotov, P.V. Korolenko, M.S. Maganova, and V.G. Makarov	32	41
Controlled holographic recording in azo-containing liquid-crystal polymer films. A.N. Simonov, A.V. Larichev, and V.I. Shmalgauzen	35	46

Acoustics and Molecular Physics

Spectral density of vortical velocity pulsations in a well-developed free turbulent flow. S.G. Mikhailov	39	52
--	----	----

Solid-State Physics

The electronic spectrum and optical transitions in superlattices with quasi-localized states in the unit cell. A.V. Dmitriev and V.V. Makeev	45	56
On the determination of the $ZnAs_2$ band structure parameters. V.A. Morozova, S.F. Marenkin, and O.G. Koshelev	49	62
Why does the Meissner effect arise? N.B. Brandt, G.A. Mironova, and V.V. Rzhetskii ...	52	68

(continued)

X-ray diffraction study of interatomic correlations in alloys with components having close atomic numbers (Cu-Zn and Cu-Ni). A.A. Katsnelson, V.M. Silonov, T.V. Skorobogatova, and O.V. Kris'ko	55	73
Inverse reluctance in granulated ferromagnetic alloys. A.B. Granovskii, V.A. Kovalev, and J.-P. Clerc	60	79

Geophysics

Seismotectonic strain of lithosphere in the Aegean region. E.V. Voronina and A.V. Lyusina	66	83
---	----	----

Brief Communications

Theoretical and Mathematical Physics

Statistical properties of fixed points of dynamic systems. P.V. Elyutin	71	90
Studying physical processes in nonperiodic highly heterogeneous media. G.N. Medvedev and B.I. Morgunov	72	92

Acoustics and Molecular Physics

Excitation of nonlinear waves by finite-amplitude vibrations of a sphere in a linearly deformable medium. Wang Ning and O.V. Rudenko	73	95
--	----	----

CONTENTS

VOLUME 55

NUMBER 3

2000

MOSCOW UNIVERSITY PHYSICS BULLETIN

Pages
Russian/English

Theoretical and Mathematical Physics

- Identification problem for a quasi-equilibrium immunology model. V.B. Glasko, S.V. Rodionov, A.A. Volodin, and A.S. Sobolevsky 6 1
- Hybrid renormalization in the Yang–Mills model. D.A. Slavnov 12 6

Radiophysics

- Characteristics of 3-mm wave band peniotron in permanent magnet focusing system. A.P. Sukhorukov, A.F. Korolev, A.V. Sheludchenkov, G.I. Sergeev, I.I. Golenitskii, O.V. Evtushenko, E.I. Kanevskii, O.I. Karnaukh, and I.P. Chepurnykh 15 11
- Modeling processes with high dimensionality of embedding spaces. D.A. Gribkov, V.V. Gribkova, and Yu.I. Kuznetsov 19 17

Optics and Spectroscopy

- Argon laser frequency conversion in compressed hydrogen in biharmonic pumping. N.V. Kravtsov and N.I. Naumkin 22 21
- Order parameter of homeotropically oriented comb-shaped liquid crystal polymer films. D.F. Kiselev, T.M. Glushkova, S.A. Ivanov, M.M. Firsova, and A.P. Shtyrkova ... 24 25

Solid-State Physics

- Dependence of pulse switching curve of iron borate monocrystals on their thickness. V.A. Bukvin, O.S. Kolotov, and V.A. Pogozhev 31 31
- Strain susceptibilities and elastic constant anomalies of Tb, Dy, and Ho vanadates. Z.A. Kazei, N.P. Kolmakova, and O.A. Shishkina 33 34
- Numerical modeling of pulsed magnetization transfer in magnetic resonance imaging. V.L. Yarnykh and D.A. Kupriyanov 36 39

Geophysics

- Effect of magnetic fields on differential streams in planets and stars. V.I. Grigoryev and V.S. Rostovskii 41 46
- Pressure of ocean solitary waves on earth crust. S.A. Arsenyev, O.A. Zhivogina, and N.K. Shelkovnikov 47 51
- New solution of spatial ergodicity problem for wave propagation in a free space between the ionosphere and the Earth. A.G. Vologdin and V.D. Gusev 49 55

Astronomy

- Observation of loop trap of solar cosmic rays on August 20, 1991. S.I. Ermakov, N.N. Kontor, G.P. Lyubimov, N.N. Pavlov, V.I. Tulupov, E.A. Chuchkov, and B.Ya. Shcherbovsky 53 60
- Universal method of calculating perturbation function in numerical analysis theory of minor planet motion. I.A. Gerasimov, V.V. Chazov, and D.A. Tagaeva 55 64

(continued)

Brief Communications

Theoretical and Mathematical Physics

Estimation of constituent quark mass from finite-energy sum rules. V.A. Meshcheryakov and D.V. Meshcheryakov	58	68
Bistability of synchronous oscillations in van der Pol oscillator. P.V. Elyutin	59	71
Application of the Hamilton–Jacobi theory for studying geodesics in Visser’s theory of gravitation. I.P. Denisova, A.A. Zubrilo, and V.B. Tverskoy	61	74

Atomic and Nuclear Physics

High-efficiency source of hard bremsstrahlung based on recycling accelerator. V.K. Grishin, B.S. Ishkhanov, and S.P. Likhachev	62	76
--	----	----

Solid-State Physics

Quasi-static band domain structure in ferrite-garnet films. A.I. Akhutkina and T.B. Shapaeva	64	79
--	----	----

Theoretical and Mathematical Physics

Axion emission by electrons scattered by fluxoids in a superconducting core of a neutron star. A.V. Borisov and P.E. Sizin	3	1
Fragmentation of polyatomic organic molecules on the surface under the action of low-energy ions. V.V. Komarov, A.M. Popova, I.O. Stureiko, and H. Jungclas	5	5
Binary primordial black holes as sources of gamma-ray-bursts and high-frequency gravitational radiation. D.N. Abdurashitov, K.V. Parfenov, and V.E. Yants	9	10
Threshold sensitivity of a stroboscopic coordinate meter. N.V. Kozlov and F.Ya. Khalili .	12	15
Application of the GCV method to well- and ill-posed problems. V.N. Titarenko and A.G. Yagola	15	21
Structure of the photon polarization operator in an external nonuniform non-Abelian gauge field. V.Ch. Zhukovskii and V.V. Khudyakov	18	26

Atomic and Nuclear Physics

Competition of photoneutron and photoproton channels in photodisintegration of atomic nuclei. S.S. Borodina, B.S. Ishkhanov, V.I. Mokeev, and S.I. Pavlov	22	31
Two-particle quantum system: self-consistent field approximation and particle-to-particle correlations. D.V. Kulakovskii and A.M. Popov	25	35
Estimation of ion charge-exchange cross sections in carbon, aluminium, and gold. I.S. Dmitriev, Ya.A. Teplova, and Yu.A. Belkova	29	41
Anomalous asymptotics of the overlap integral for bound systems of three or more bodies. L.D. Blokhintsev, O. Dias, D.Kh. Muminova, and R. Yarmukhamedov	32	46

Optics and Spectroscopy

A method for rapidly estimating the thickness of nanometer film targets and its application in experiments on generation of picosecond X-ray pulses. V.M. Gordienko, A.B. Savel'ev, and A.A. Shashkov	41	51
An adaptive system with a shearing interferometer in an optical feedback circuit. P.V. Ivanov, A.V. Koryabin, and V.I. Shmal'gauzen	45	57

Solid-State Physics

Interpreting the anomalous growth of coercive force and magnetic viscosity in ferrites near the Curie point. K.P. Belov	48	63
---	----	----

Geophysics

The possibility of earthquake prediction by a polarimetric method. V.I. Grigor'ev and V.S. Rostovskii	54	68
---	----	----

(continued)

Brief Communications

Theoretical and Mathematical Physics

Angular distribution of neutral particle radiation in electromagnetic field. A.E. Lobanov and O.S. Pavlova	61	72
Integrals of motion of the Calogero–Sutherland quantum system in an external field. D.V. Meshcheryakov and V.B. Tverskoi	63	75

Optics and Spectroscopy

Two-stream high-frequency instability in atomic media. V.K. Grishin	64	78
---	----	----

Geophysics

The mechanism of transformation of ocean stratification structure by seismic floor motions. M.A. Nosov and S.N. Skachko	66	81
---	----	----

Astronomy

Motion of a spacecraft equipped with a current-carrying rod on polar orbit in the Earth's gravitational and magnetic fields. V.I. Denisov and V.B. Pinchuk	69	85
--	----	----

MOSCOW UNIVERSITY PHYSICS BULLETIN

Pages
Russian/English

Theoretical and Mathematical Physics

Wave dispersion in paramagnetic systems. L.S. Kuz'menkov, S.G. Maksimov, and V.V. Fedoseev	3	1
Effective rank of infinite-dimensional linear measurement model. M.L. Serdobol'skaya	5	5
Effective action in $SU(2)$ gauge model with vortex. V.Ch. Zhukovskii	8	10
Explicit solutions of equations of motion for one class of completely integrable classical four-particle systems in external field. D.V. Meshcheryakov and V.D. Tverskoy ...	12	15
Spectral problem for nuclear Coulomb potential. O.S. Pavlova, D. Baskaran, and A.R. Frenkin	14	18
Integral equation method used in solving problems of waveguide bioinformatics. V.P. Modenov and I.K. Troshina	17	24

Atomic and Nuclear Physics

Possibilities of utilizing photonuclear reactions to obtain energy in fission processes. B.S. Ishkhanov, S.P. Likhachev, and V.I. Mokeev	21	30
--	----	----

Radiophysics

Kinetic theory of low-frequency instability of gas-discharge plasma. O.V. Kudrevatova, Meong-Khi Ri, and A.A. Rukhadze	32	35
--	----	----

Optics and Spectroscopy

Unperturbing measurements of highly stable solid-state lasers characteristics. N.V. Kravtsov and S.V. Fetisov	35	39
---	----	----

Geophysics

Reconstruction of altitude profiles of electron collision effective frequency in isotropic flat-layered ionosphere. V.D. Gusev, E.G. Mikhailova, and L.I. Prikhod'ko	38	45
Possibility of remote polarimetric investigation of electric field of the Moon. V.I. Grigoryev and V.S. Rostovskii	41	49
Fractal dimensionality of ionospheric radio signals. D.V. Kiryanov, N.V. Karabanov, and D.I. Saponov	44	54

Brief Communications

Theoretical and Mathematical Physics

Study of characteristic equations for an electromagnetic wave propagating in the field of intense laser radiation according to the Born-Infeld laws of electrodynamics. V.I. Denisov, N.V. Kravtsov, E.G. Larionov, A.A. Zubrilo, and V.B. Pinchuk	51	59
--	----	----

(continued)

Atomic and Nuclear Physics

Bremsstrahlung emission accompanying α -decay of ^{210}Po nucleus. N.V. Eremin, S.V. Klimov, D.A. Smirnov, and A.F. Tulinov	53	62
---	----	----

Radiophysics

Measurement of low optical loss in liquids by “whispering gallery” modes resonator method. E.N. Alyrzaev, M.L. Gorodetsky, V.S. Ilchenko, and A.A. Savchenkov	55	65
Interference of radio oscillations with incommensurable frequencies. N.V. Evdokimov and V.P. Komolov	57	68

Optics and Spectroscopy

Anisotropy of anisometric speckle structures. Yu.V. Vasil'ev, A.V. Kozar', E.F. Kuritsyna, and A.E. Luk'yanov	59	72
---	----	----

Solid-State Physics

Origination of iron oxide nanoclusters on silicate glass formation. A.A. Novakova, T.Yu. Kiseleva, and I.V. Kovaleva	61	76
--	----	----

Geophysics

Effect of component composition on phonon heat transfer intensity in binary solid solutions of rockforming minerals. G.I. Petrunin and I.A. Ilyin	63	80
Vertical structure of wind velocity at intense atmospheric convective vortex periphery. E.P. Anisimova, A.M. Nikolaev, A.A. Speranskaya, and O.N. Chernyshev	66	84

Theoretical and Mathematical Physics

Quantization of thermodynamics. V.P. Maslov	3	1
The excited states wave functions of discrete spectrum of integrable quantum systems of N particles in the Pöschl–Teller potential. D.V. Meshcheryakov and V.B. Tverskoi ..	8	9
Classical conservation laws for the elliptic Liouville equation. A.V. Kiselev	11	13
Study of scattering by a nonspherical particle in a layer on a substrate. E.Yu. Eremina and A.G. Sveshnikov	13	16
The basis property of root vectors for the radio waveguide. A.N. Bogolyubov, A.L. Delitsyn, M.D. Malykh, and A.G. Sveshnikov	17	22
The integral transformation method in the spectral problem for the confining potential. O.S. Pavlova and A.R. Frenkin	20	27
The method of integral equations for calculating the dielectric deflector with electrooptical control. N.E. Shapkina	23	32
Mixed problem for the Laplace equation outside the circle arc. A.I. Sgibnev and P.A. Krutitskii	27	38

Atomic and Nuclear Physics

A project of investigating the most energetic cosmic rays on the Russian segment of the International Space Station. V.V. Aleksandrov, D.I. Bugrov, G.K. Garipov, A. Cordero, J. Linsley, H. Salazar, O.A. Saprykin, A.A. Silaev, V.S. Syromyatnikov, M.I. Panasyuk, and B.A. Khrenov	33	44
---	----	----

Solid-State Physics

Strain susceptibilities and elastic-constant anomalies of TmVO_4 in magnetic field. Z.A. Kazei, N.P. Kolmakova, and O.A. Shishkina	40	49
The heat capacity of thin ferroelectric films near the second-order phase transition. S.V. Pavlov and O.Yu. Polyakova	44	55

Geophysics

A new approach to space ergodicity in wave propagation through a randomly inhomogeneous refractive medium. A.G. Vologdin and V.D. Gusev	48	60
Gradient density current with an inner wave caused by wind strengthening. B.I. Samolyubov, A.L. Zamarashkin, A.V. Silaev, and M.V. Sluev	51	65

Astronomy

On the convergence of a perturbation function expansion in the three-body problem for Lindblad resonances in the case of large eccentricities. I.A. Gerasimov and B.R. Mushailov	60	73
--	----	----

(continued)

Brief Communications

Radiophysics

Surface microwave discharge in a supersonic air flow. V.M. Shibkov, D.A. Vinogradov,
A.V. Voskanyan, A.P. Ershov, I.B. Timofeev, L.V. Shibkova, and V.A. Chernikov 65 80

Solid-State Physics

The influence of the semiclassical size effect on the optical and magneto-optical properties of
granular alloys. A.B. Granovskii, M.V. Kuz'michev, and A.N. Yurasov 67 83

Geophysics

The effect of the underlying surface temperature field on the characteristics of an intense
convective air vortex. E.P. Anisimova, A.A. Speranskaya, and O.N. Chernyshev .. 70 87
