MOSCOW UNIVERSITY PHYSICS BULLETIN

Pages
Russian/English

Theoretical and Mathematical Physics

| | | |
|---|----|----|
| Quantization of Lorentz-invariant systems in terms of Bogolyubov group variables. I: Coordinate and linear-momentum operators. S.Yu. Vernov, O.A. Khrustalev, and M.V. Chichikina | 3 | 1 |
| Dirac equation in gauge field configurations modeling central vortices. V.Ch. Zhukovskii and A.V. Skobeev | 6 | 6 |
| Numerical algorithm for calculation of supersonic flows based on quasi-gas dynamic equations. T.G. Elizarova and M.E. Sokolova | 10 | 12 |
| Heavy Majorana neutrinos in dilepton production at lepton-proton colliders. A. Ali, A.V. Borisov, and D.V. Zhuridov | 15 | 19 |
| Perturbations in Einstein's gravity theory: Conserved currents. A.N. Petrov | 18 | 24 |

Atomic and Nuclear Physics

| | | |
|--|----|----|
| Albedo flux generated in matter by particles with energy above 1 TeV. D.M. Podorozhnyi, I.D. Rapoport, and A.N. Turundaevskii | 25 | 29 |
| Reconstruction of energy spectrum and mass composition of primary cosmic rays from electron and muon number size spectra. E.A. Vishnevskaya, V.N. Kalmykov, N.N. Kalmykov, G.V. Kulikov, and V.P. Sulakov | 28 | 35 |
| Transmutation of the ^{165}Ho isotope in intensive γ -quanta flux. B.S. Ishkhanov, I.A. Lyutikov, and S.I. Pavlov | 32 | 41 |
| Possibility of population inversion between nuclear levels. A.V. Andreev and R.A. Chalykh | 34 | 45 |
| A scientific and educational complex for superhigh-energy cosmic ray research. O.V. Vedeneev, G.K. Garipov, A.V. Igoshin, N.N. Kalmykov, G.V. Kulikov, V.I. Nazarov, M.I. Panasyuk, A.A. Silaev, A.A. Silaev Jr., V.P. Sulakov, Yu.A. Fomin, B.A. Khrenov, and A.V. Shirokov | 38 | 50 |

Optics and Spectroscopy

| | | |
|---|----|----|
| Estimating the size of a molecule by measuring time-domain coherent anti-Stokes Raman scattering. S.Yu. Nikitin | 42 | 55 |
|---|----|----|

Solid-State Physics

| | | |
|---|----|----|
| Photorefectance spectroscopy study of built-in electric fields in stressed GaAs/GaAsP superlattices. L.P. Avakyants, P.Yu. Bokov, T.P. Kolmakova, and A.V. Chervyakov | 45 | 60 |
| Hot plasma at the geostationary orbit. Some features of angular distributions of electron fluxes. N.A. Vlasova, B.V. Mar'in, S.Ya. Reizman, I.A. Rubinshtein, E.N. Sosnovets, and M.V. Tel'tsov | 55 | 65 |
| Magnetomineralogical features of magnetite from different sedimentary rocks and deposits. N.A. Sed'mov, V.F. Babanin, V.V. Morozov, A.A. Zalutskii, V.I. Trukhin, and S.A. Shoba | 59 | 70 |

Brief Communications

Solid-State Physics

| | | |
|--|----|----|
| Effect of resonance Mössbauer filter on the ^{125m}Te isomer decay. A.A. Opalenko, V.I. Vysotskii, and A.A. Kornilova | 66 | 78 |
|--|----|----|

MOSCOW UNIVERSITY PHYSICS BULLETIN

Pages
Russian/English

Theoretical and Mathematical Physics

| | | |
|---|----|----|
| Equation of motion for a charged Brownian particle with the radiation-reaction term. A.I.A. Vlasov | 3 | 1 |
| Quantization of Lorentz-invariant systems in terms of Bogolyubov group variables. II: Construction of perturbation theory. S.Yu. Vernov, O.A. Khrustalev, and M.V. Chichikina | 6 | 5 |
| Conserved currents in D -dimensional gravity and cosmology with branes. A.N. Petrov | 10 | 11 |
| Trapped modes in an electromagnetic waveguide with an obstacle. A.N. Bogolyubov, A.L. Delitsyn, and A.E. Lokshanova | 13 | 16 |
| Model kinetics of erythrocyte hemolysis under the action of an electron beam and a pulsed electric field. E.K. Kozlova, A.P. Chernyaev, A.M. Chernysh, U.A. Bliznyuk, and P.Yu. Alekseeva | 19 | 20 |
| Generation of Lorentz and CPT noninvariant radiative corrections in an extended QED model. V.Ch. Zhukovskii and A.S. Razumovskii | 23 | 26 |

Atomic and Nuclear Physics

| | | |
|---|----|----|
| Transmutation track formation on $^{120,122,124}\text{Sn}$ isotopes exposed to high-intensity γ -quanta beams. B.S. Ishkhanov and S.I. Pavlov | 27 | 31 |
| Waveguide enhancement of spin-flip scattering in reflection of polarized neutrons from the "soft-magnetic/hard-magnetic" layered structure. Yu.N. Khaidukov and M.A. Andreeva | 30 | 36 |

Radiophysics

| | | |
|--|----|----|
| Simultaneous suppression of water and fat signals in magnetic resonance tomography exper- iments. N.V. Anisimov | 35 | 43 |
|--|----|----|

Solid-State Physics

| | | |
|---|----|----|
| Influence of the thermoelectret effect on discharge of a dielectric exposed to electron beam. N.N. Negulyaev, S.I. Zaitsev, and E.A. Grachev | 43 | 48 |
| Quasilocal nature of the effect of the magnetic nonuniformity field on the strip domain structure. M.L. Akimov and P.A. Polyakov | 47 | 53 |
| Points of magnetic moment compensation in the $\text{Yb}(\text{Fe}_{1-x}\text{Mn}_x)_2$ pseudobinary sys- tem. A.S. Ilyushin, I.A. Nikanorova, A.V. Tsvyashchenko, A.S. Vinogradova, M.V. Fomicheva, and I.V. Spazhakin | 51 | 58 |
| Effect of multi-component inorganic impurity $\text{K}_4[\text{Ru}_2\text{Cl}_{10}\text{O}]$ on phase transition and dielec- tric properties of KDP crystal. S.V. Grabovskii, I.V. Shnaidshstein, B.A. Strukov, S.-H. Jang, and B. Kahr | 55 | 63 |

Geophysics

| | | |
|--|----|----|
| Possibility to reconstruct the ionosphere E and D regions using ray radio tomography. E.S. Andreeva | 62 | 67 |
|--|----|----|

Brief Communications

Atomic and Nuclear Physics

| | | |
|--|----|----|
| Polarization bremsstrahlung as a means of diagnosing the fullerene structure. V.K. Grishin | 69 | 76 |
|--|----|----|

Solid-State Physics

| | | |
|---|----|----|
| Quantitative phase analysis in studies of the β -solid solution decomposition in some Ti- and Zr-based alloys. E.A. Rykova and A.G. Khundzhua | 72 | 80 |
|---|----|----|

CONTENTS

VOLUME 59

NUMBER 3

2004

MOSCOW UNIVERSITY PHYSICS BULLETIN

Pages
Russian/English

Theoretical and Mathematical Physics

| | | |
|--|----|----|
| Probability of selective fragmentation of valence bonds of polyatomic organic molecules exposed to IR radiation. V.V. Komarov, A.M. Popova, I.O. Stureiko, and H. Jungclas | 3 | 1 |
| The Galerkin method in the electrodynamics of a waveguide with a chiral medium. V.P. Modenov and I.V. Tsvetkov | 8 | 8 |
| Disturbance of tissue metabolism caused by damage to capillary ultrastructure. E.K. Kozlova, A.P. Chernyaev, U.A. Bliznyuk, and A.M. Chernysh | 11 | 13 |
| Reduction to an ideal device based on test measurement data. E.A. Cheremukhin and A.I. Chulichkov | 15 | 19 |
| Guided modes of anisotropic graded-index lightguides. V.I. Krivenkov | 19 | 25 |
| Oscillator-fermionic representations of simple Lie algebras of type B_n . O.V. Il'in | 23 | 30 |

Atomic and Nuclear Physics

| | | |
|--|----|----|
| Solar cosmic ray protons in periods of inversion of the solar polar magnetic field. I.V. Getselev, V.P. Okhlopov, and E.A. Chuchkov | 25 | 33 |
| Electron-beam optics in a laser microaccelerator. Yu.K. Alekseev, A.A. Vetrov, D.A. Zayarnyi, B.S. Ishkhanov, and V.I. Shvedunov | 29 | 39 |
| Analysis of the arrival time distribution of extensive air showers registered with the EAS MSU array by classical statistics methods. M.Yu. Zotov, G.V. Kulikov, and Yu.A. Fomin | 37 | 44 |
| Inverse β^+ -decay of the proton in the presence of a strong magnetic field. I.V. Mamsurov and H. Goudarzi | 40 | 48 |

Radiophysics

| | | |
|--|----|----|
| Fabry-Perot cavity-based small-displacement transducer for investigation of mechanical noise in prototype mirror suspensions of gravitational wave antennas. I.A. Bilenko and N.Yu. Lyaskovskaya | 47 | 53 |
| Quasioptimal algorithms for statistical coincidence analysis in a gravitational wave experiment. A.V. Gusev and V.N. Rudenko | 51 | 59 |

Solid-State Physics

| | | |
|--|----|----|
| Physical foundations of long-term memory of water. V.I. Vysotskii and A.A. Kornilova | 58 | 64 |
|--|----|----|

Brief Communications

Optics and Spectroscopy

| | | |
|---|----|----|
| Transverse scattering of surface plasmon-polaritons and speckles. Yu.V. Vasil'ev, A.V. Kozar', E.F. Kuritsyna, and A.E. Luk'yanov | 63 | 70 |
|---|----|----|

Solid-State Physics

| | | |
|---|----|----|
| Phonon focusing in the α - and β -quartz phases. K.N. Baranskii and I.V. Shlyakhov | 66 | 74 |
|---|----|----|

CONTENTS

VOLUME 59

NUMBER 4

2004

MOSCOW UNIVERSITY PHYSICS BULLETIN

Pages
Russian/English

Theoretical and Mathematical Physics

| | | |
|--|----|----|
| Mathematical problems arising in the development of an “ecological policeman”. N.A. Tikhonov, M.K. Trubetskov, and G.N. Medvedev | 3 | 1 |
| Spectral properties of an electromagnetic waveguide with nonuniform filling. A.N. Bogolyubov, M.D. Malykh, and V.L. Ponomareva | 10 | 11 |
| To the Dirichlet–Neumann problem for the Helmholtz equation outside cuts in a plane. P.A. Krutitskii and K.V. Prozorov | 13 | 16 |
| Quantum corrections in $N = 1$ supersymmetric electrodynamics regularized by higher derivatives. A.A. Soloshenko and K.V. Stepanyants | 17 | 21 |
| Evolution of the spin of a charged particle in an electric field. A.E. Lobanov | 25 | 26 |

Atomic and Nuclear Physics

| | | |
|--|----|----|
| Gamma sources with a wide-angle irradiation field. V.K. Grishin, B.S. Ishkhanov, S.P. Likhachev, and V.I. Shvedunov | 29 | 31 |
| Studies by nonlinear analysis techniques into the distribution of the arrival times of exten- sive air showers from the data obtained with the EAS MSU setup. M.Yu. Zotov, G.V. Kulikov, and Yu.A. Fomin | 33 | 35 |

Radiophysics

| | | |
|--|----|----|
| Effect of the longitudinal magnetic field on the radial electric field in a low-pressure discharge. R.Z. Shaikhitdinov and V.M. Shibkov | 46 | 40 |
|--|----|----|

Solid-State Physics

| | | |
|---|----|----|
| Variation of the domain-wall relaxation frequency in an amorphous ferromagnet under ad- sorption of methanol molecules. V.E. Zubov, A.D. Kudakov, N.L. Levshin, and T.S. Fedulova | 49 | 44 |
|---|----|----|

Geophysics

| | | |
|---|----|----|
| Model of shear layer interaction and description of mass exchange in a density flow. B.I. Samolyubov and A.V. Shil'nev | 52 | 48 |
|---|----|----|

Brief Communications

Theoretical and Mathematical Physics

| | | |
|--|----|----|
| New aspects in the spectral problem of the radial Schrödinger equation with an arbitrary attracting potential. O.S. Pavlova and A.R. Frenkin | 57 | 56 |
| Ferromagnetic state of the $SU(2)$ -vacuum. V.Ch. Zhukovskii and O.V. Tarasov | 60 | 60 |
| Effect of Mach number on electric-discharge characteristics in supersonic airflow. A.F. Alexandrov, A.P. Ershov, B.I. Timofeev, and I.B. Timofeev | 63 | 65 |

Optics and Spectroscopy

| | | |
|---|----|----|
| Effect of ultralow-frequency commutation of radiation direction in solid-state ring lasers in self-modulation modes of the second kind. A.N. Shelaev | 65 | 68 |
|---|----|----|

Solid-State Physics

| | | |
|--|----|----|
| Investigation of dissipation in the torsion modes of thin fused silica fibers. I.A. Bilenko and S.L. Lourie | 68 | 72 |
|--|----|----|

CONTENTS

VOLUME 59

NUMBER 5

2004

MOSCOW UNIVERSITY PHYSICS BULLETIN

Pages
Russian/English

Theoretical and Mathematical Physics

- Resonance properties of waveguides with nonuniform filling. A.N. Bogolyubov, D.I. Ermishin, and M.D. Malykh 3 1
- Terms of the one-dimensional molecular D_2^- -ion in a longitudinal magnetic field. V.Ch. Zhukovskii, V.D. Krevchik, A.A. Marko, M.B. Semenov, and A.B. Grunin .. 7 8

Atomic and Nuclear Physics

- The high-intensity source of secondary particles. B.S. Ishkhanov and S.P. Likhachev 11 13
- Neutron production in lightnings. B.M. Kuzhevskii 14 17

Optics and Spectroscopy

- Investigation of the structure of polyelectrolyte-micelle complexes by the dynamic light scattering method. D.B. Alekseev, D.V. Bulakov, and A.M. Saletskii 21 22

Solid-State Physics

- Emission properties of linear-chain carbon. Yu.E. Prazdnikov, A.D. Bozhko, M.B. Guseva, and N.D. Novikov 37 26

Geophysics

- Effect of the El Niño phenomenon on the formation of tropical cyclones in the pacific ocean. R.N. Kalashnikov, D.A. Khanin, A.B. Nelepo, and G.G. Khundzhua 42 32
- Fine structure of the flow velocity fields in the ocean. S.A. Arsen'ev, V.N. Nikolaevskii, and N.K. Shelkovnikov 45 36
- Altitude dependence of the tidal electric field. V.I. Grigor'ev and V.S. Rostovskii 51 44
- Statistics of sea surface slopes and its application to laser sounding. A.S. Zapevalov and K.V. Pokazeev 53 47
- Nonlinear steady flows caused by vibrations of a bottom area. M.A. Nosov and S.N. Skachko 57 52

Astronomy

- The interaction of the active regions and coronal holes in the Sun. L.M. Kozlova 62 58

Brief Communications

Radiophysics

- Ignition of supersonic jets of hydrocarbon propellants by microwave discharges. V.M. Shibkov, A.F. Aleksandrov, A.P. Ershov, A.A. Karachev, R.S. Konstantinovskii, I.B. Timofeev, V.A. Chernikov, and L.V. Shibkova 67 64

Optics and Spectroscopy

- Optimal spectral range of OFCL with one- and two-stage Raman amplifiers. N.A. Kazantseva and O.E. Nanii 70 67

Acoustics and Molecular Physics

- An acoustic spectrograph. A.N. Astaf'ev, K.N. Baranskii, P.I. Doreuli, A.R. Khokhlov, and I.V. Shlyakhov 72 70

CONTENTS

VOLUME 59

NUMBER 6

2004

MOSCOW UNIVERSITY PHYSICS BULLETIN

Pages
Russian/English

Theoretical and Mathematical Physics

| | | |
|--|----|----|
| Reliability of one type of smooth approximation of stochastic data. N.N. Negulyaev | 3 | 1 |
| Waveguide modes with Shchukin–Leontovich boundary conditions. A.N. Bogolyubov, M.D. Malykh, and Yu.V. Mukhartova | 7 | 6 |
| Global monopole in the Randall–Sundrum universe. Yu.V. Grats and A.A. Rossikhin | 11 | 12 |
| Dirac fermions in a strong Coulomb field. V.R. Khalilov and H. Goudarzi | 15 | 17 |

Atomic and Nuclear Physics

| | | |
|--|----|----|
| Optimal-monoenergetic representation of results of photonuclear experiments in gamma-bremsstrahlung. V.V. Varlamov, D.S. Rudenko, and M.E. Stepanov | 19 | 22 |
| Formation of the ^{178}Hf isotope in an intense γ -quantum beam irradiating a sample of natural Hf isotope mixture. B.S. Ishkhanov, I.A. Lyutikov, and S.I. Pavlov | 25 | 31 |

Optics and Spectroscopy

| | | |
|--|----|----|
| “Dual” perturbation theory for the study of processes occurring in ultrahigh laser light fields. A.V. Andreev and A.V. Zayakin | 29 | 37 |
|--|----|----|

Solid-State Physics

| | | |
|---|----|----|
| To the theory of coupled oscillations of electron and nuclear systems. V.L. Marchenko, A.M. Savchenko, and B.I. Sadovnikov | 44 | 45 |
| Analysis of nonuniform distributions of defects in proton-irradiated silicon photoelectric transducers. O.G. Koshelev, V.A. Morozova, G.M. Grigor’eva, K.N. Zvyagina, and A.V. Spasskii | 50 | 49 |

Brief Communications

Theoretical and Mathematical Physics

| | | |
|--|----|----|
| Ferromagnetic state of the $SU(2)$ gauge field model. V.Ch. Zhukovskii, O.V. Tarasov, and D. Ebert | 57 | 55 |
|--|----|----|

Optics and Spectroscopy

| | | |
|--|----|----|
| Model of an adaptive optical system in turbulent atmosphere. A.V. Koryabin, M. Moradi, and V.I. Shmal’gauzen | 61 | 61 |
|--|----|----|

Acoustics and Molecular Physics

| | | |
|---|----|----|
| Dissociation rate constants of atmospheric gases. A.I. Osipov and S.L. Shelepin | 64 | 64 |
|---|----|----|

Geophysics

| | | |
|--|----|----|
| Manifestations of heliogeophysical disturbances in October 2003 in the ionosphere over Western Europe from GNSS tomography and ionosonde measurements. V.E. Kunitsyn, M.A. Kozharin, I.A. Nesterov, and M.O. Kozlova | 67 | 68 |
|--|----|----|
